## COURSES

Studying languages at university involves so much more than reading books! It will involve the study of the language, culture, history and politics too. There will often be a chance to study or work abroad too for up to a whole year. This time abroad is seen as a very valuable chance to really understand the language and culture more.

There are several different options with studying languages at university. You can concentrate on one, or do a combination of two. You could carry on with what you have done at A level, or pick up a new language or two, for instance Russian, Chinese or Arabic. Or a mixture of new and old. As well as these options, you could take a joint degree where you do a language as well as another subject which isn't language based—the options are endless!

Latin is very useful for several degrees too, from medicine, horticulture and physiotherapy.
